

Libraries creation

Init Library

A Library can be created running the following command with the APX CLI:

```
apx init lib -y -u=TEST -c=001 -d="New Library"
```

All fields are mandatory and have their respective restrictions:

- Application code (UUA): It must be 4 characters.
- Library code: It must be 3 characters ("R" + three alphanumerals).
- Description.

The output should look something like this:

```
APX Architecture
- Group: com.bbva.elara
- Artifact: elara-project
- Version: 7.12.9
Artifact(lib)
- Application(UUA): TEST
- Library code "R[code]": 001
- Project interface: TESTR001
- Project implementation: TESTR001IMPL
- Description: New Library
- Version: 0.0.0
- OutPut Directory: /home/user/code/test
```
