

Transaction creation

Init Transaction

A Transaction can be created running the following command with the APX CLI:

```
apx init trx -y -u=TEST -c=001 -d="New Transaction" --trx-version="01" --trx-country="ES"
```

All parameters are mandatory and have their respective restrictions.

- Application (UUAA) code: must be 4 characters.
- Transaction code: must have 3 characters ("T" + three alphanumerals).
- Description: must be specified and must have a functional meaning.
- Version: must contain two numerical characters.
- Country: must have 2 characters. In case of Transactions multi-country, the value is **ZZ**.
